

# APPROVED COMPATIBLE MATERIALS LIST

Thank you for choosing OPACI-COAT-300® for your project. To help ensure project success, please read the following information regarding glazing materials approved for use with products coated with OPACI-COAT-300®.

All listed materials were tested, according to a modified ASTM C1087 method, for single-component compatibility with ICD's OPACI-COAT-300® product only. This testing does not determine compatibility in combination with other materials, even where those other materials may also be tested and individually approved for use.

ICD cannot be held responsible for changes in formulations or manufacturing components that may significantly alter the chemical and/or mechanical properties of any of the products listed below.

# **PRODUCT NAME**

OPACI-COAT-300® Water-Based Silicone Spandrel

## **PRODUCT CODE**

RC / OC - All Colors

## **MANUFACTURER**

ICD High Performance Coatings + Chemistries 7350 S Union Ridge Parkway Ridgefield, WA 98642

Phone: +1 (360) 546-2286 Fax: +1 (360) 546-2287 Email: icd@icdcoatings.com

ICD does not provide or guarantee specific adhesion performance or any other specific fitness of use for any of the listed materials as individual design configurations, conditions, and requirements vary.

Project-specific submittals of all glazing materials and consultation with all component manufacturers regarding suitability of use, individually and/or in combination with all other materials, may be required.

If products of interest are not included in the lists below, contact ICD for a broader database search of tested materials. If the products are not found in the database, or test results are outdated, you may arrange single-component compatibility testing of the products free of charge. The test requires 30 days from material set-up to report of results.

Call ICD Technical Services at (360) 546-2286 with any questions about the information provided in this document.
